Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/2/07 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-9,56-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reiley et al. (7,081,122) in view of Moaddeb (6,671,561).

With respect to the above claims, Reiley et al disclose kit for delivery of a composition into an intraosseous space comprising at least one cannula (50) at least one stylet (23) insertable into a cannula and being movable therein, at least one catheter (130) that is insertable into the cannula; and a system (136,140,142) for delivery of aliquots of the composition into the intraosseous space via the catheter; asset forth in column 4, lines 14-25, column 7, lines 39-59, column 8, lines 35-67, column 9, lines 1-67, column 10, lines 1-14.

Application/Control Number: 10/654,543

Art Unit: 3733

It is noted that Reiley et al did not teach of a catheter having a substantially rigid high-porosity tip; as claimed by applicant. However, in a similar art, Maddeb, column 3, lines 20-67, column 4, lines 1-67 evidences the use of a catheter having a substantially high-porosity tip to prevent damage to the interior walls of the heart or blood vessels.

Therefore, given the teaching of Motoda, it would have been obvious to one having ordinary skill in the art at the time the invention to modify the tip of the catheter of Reiley et al, as taught by Motoda to prevent damage to the interior walls of the heart or blood vessels.

Response to Amendment

Applicant's arguments, see Remarks, filed 8/2/07, with respect to the rejection(s) of claim(s) 1-9, 56-59 under 103 have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Moaddeb.

Conclusion

A shortened statutory period for reply to this action is set to expire THREE MONTHS from the mailing date of this action.
